Stapledon Arts is Where Representation & Creativity Meet

Our mission is to inspire Black & Brown emerging artists and art professionals through Art Education.

We accomplish this through our three pillars:

Representation • Art Education • Professional Development

To provide representation in art education and make our mission tangible, we have created a line of acrylic paints specifically with artists of color in mind.

The set includes four of the following complexions:

Deep Tones

Warm Tones

Medium Tones

Light Tones

Melanin Series will make it more accessible for Black and Brown young, emerging, and professional artists to create figures and portraits that authentically represent their truth, identity, and communities.
